# OCEAN SOLUTION

## AG FOLIAR

OceanSolution™ is an ALL NATURAL nutrient used to supplement current fertilizer programs and is comprised completely from natural material. Through a proprietary and patented method we combine an unornamented fermented product with harvested nutrients (i.e. potassium chloride) from deep ocean water. This product consistently encourages growth and reproduction in both soil and plants.

**Directions of Use:** Stir or shake well before using; Keep agitated during application. OceanSolution Ag Foliar is blended specially for direct application to the leaves of planted or hydroponic crops. Dilute at a rate of 100 – 150 parts carrier water to 1 part of OS Ag Foliar. One gallon of OS Ag Foliar per acre per month is a safe starting point. Apply solution onto the foliage of your crops to the point drip. We suggest applications be applied early morning or late afternoon. Please contact us for our latest application guidelines for your specific growing needs

For Florida: We recommend that you follow the Green Industries BMP's at:  
[http://www.dep.state.fl.us/water/nonpoint/docs/nonpoint/BMP\\_Book\\_final.pdf](http://www.dep.state.fl.us/water/nonpoint/docs/nonpoint/BMP_Book_final.pdf)
