# OCEAN SOLUTION™

## HOME & GARDEN™

OceanSolution Home & Garden™ is for use on Turf, Shrubs, Trees, Ornamentals, Flowering Plants, and Vegetable Gardens. When properly diluted, it is safe for use on all plant types including your indoor potted plants.

OceanSolution™ is an ALL NATURAL nutrient used to supplement current fertilizer programs and is comprised completely from natural material. Through a proprietary and patented method we combine an unornamented fermented product with harvested nutrients (i.e. potassium chloride) from deep ocean water. This product consistently encourages growth and reproduction in both soil and plants.

**Directions of Use:** Stir or shake well before using; Keep agitated during application.

Apply 2-3 ounces of OS H&G™ in .5 gallon to 5 gallons of water per 1,000 square feet. Retreat every 4 weeks throughout the growing season. For Houseplants and other container plants: Mix 1oz OS H&G with 1 Gallon clean water and lightly spray your plant foliage or soil. Retreat every 7 - 14 days.

(For additional rate information for your growing needs, visit [www.oceansolution.com](http://www.oceansolution.com))

Applications may be applied by all customary spray techniques and equipment. OceanSolution™ is compatible with most insecticides, fungicides, and other soluble fertilizers and micro-nutrients. When tank mixing OceanSolution™ with other products, observe all precautions and limitations on each separate product label. Standard Jar testing should precede any mixing and application to insure compatibility.

"OceanSolution™ Satisfaction Guarantee" If you are not satisfied with OceanSolution™, return the empty container along with the original receipt and we will refund the purchase price. Please mail these items to the address indicated on the bottom of the label.
