

# Turf & Ornamental Factuals

**From: Bob Marino (Brooksville, FL)**

"I'm Bob Marino, Superintendent at Silverthorn Country Club. As a Superintendent, I try many new products in the pursuit of the "perfect" golf course. The most impressive new product I have used is OceanSolution. I was introduced to OceanSolution about a month ago. After just three applications, I am seeing amazing results. It's hard to believe, but, even with the adverse weather conditions we have been experiencing lately, I have been able to improve and maintain the color of the greens as well as strengthen the root system. I am a true believer in OceanSolution and will continue to use it throughout the year. My recommendation to my peers... go "green" with OceanSolution!"

**From: Sean Klotzbach (Lakeland, FL)**

"I am the Golf Course Superintendent at The Golf Club at Bridgewater in Lakeland, Florida. I was introduced to OceanSolution 8 weeks ago and have been applying to my non overseeded 'Jones Dwarf' bermudagrass putting greens. This has been one of the coldest winters and we have had 9 frosts here at the golf course to date. My greens have never looked this good especially at a time when they should be completely shutting down growth wise. The color is exceptional as well!!! I am hooked on your product and look forward to using Ocean Solution as a base for all my fertility!!"

**From: Winford Fowler (Tampa, FL)**

Just wanted to say thank you for introducing me to OceanGrown. I have used this fertilizer on several St. Augustine lawns on a monthly basis for a few months and have seen drastic changes in color and growth. A rich deep green and thickening of runner shoots have helped increase sales in neighborhoods, not to mention how safe the product is to use. I also use it on ornamental shrubs, flowers and trees. I have not seen it burn any plants and I think it's a much better product than soluble fertilizers. Thanks again for your help!
