

When plants were CREATED- soil used to have every element on this chart! See the black ones? Those are the ones listed on your fertilizer bag. Hmmm!

We've found a way to harvest the value of 90 naturally-occurring elements on the chart below. By diluting our plant mineralizer, OceanSolution, about 100 to 1 with clean irrigating water, you can return this value back into your fruits, vegetables, crops, lawn, garden, and forage grasses. Not only will your plants be healthy and vibrant, they will begin to fulfill a prime nutritional function. Long before medical doctors, plants were the world's best medicines.

The Path to Health for plants and those that grow and eat them.
